

Idox. Do more.

A photograph of a renewable energy landscape. In the foreground, there are rows of solar panels. In the background, several wind turbines are silhouetted against a hazy sky with a bright sun. The scene is set in a rural area with hills in the distance.

FusionLive

**Engineering information.
Managed.**

FusionLive is a secure cloud-based Engineering Information Management solution designed to ensure the accuracy and integrity of information, drive project collaboration and increase the efficiency of complex capital project execution.

A secure cloud-based solution

FusionLive is a highly versatile Engineering Information Management solution that employs intelligent automation, tag extraction, best practice document controls, out-of-the box workflows and customised dashboards.

Single shared environment

The secure cloud platform supports collaboration and allows all parties to share a common view of the project. Security is maintained through control over external supplier access and visibility of folders. Providing easy access to the right information at the right time enables better decision-making by everyone involved in the project.

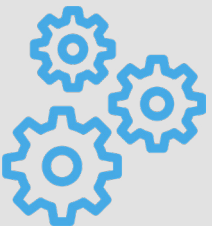

Custom project dashboards

Intuitive project dashboards facilitate analysis, monitoring and control of project delivery by all parties and encourage a more proactive approach to project management that drives efficiency and improves productivity. Scheduled status reports are easily distributed to help keep all parties on track and automatic notifications and reminders help to avoid late delivery by vendors, overdue reviews and delayed return of submittals.

Proven document controls and workflows

Best of breed document controls and out-of-the box workflows promote best practice. Revision control, version history and a full audit trail ensure accountability and accuracy, helping to reduce risk and decrease disputes.

Automated processes

Automation, reduced data entry and simplification of processes all help to accelerate project delivery. Automated document distribution to the correct engineers enables faster review and document turnaround. Simplified drag and drop functionality speeds vendor submissions. A powerful search function enables the rapid retrieval of documents and a faster response to requests for information.

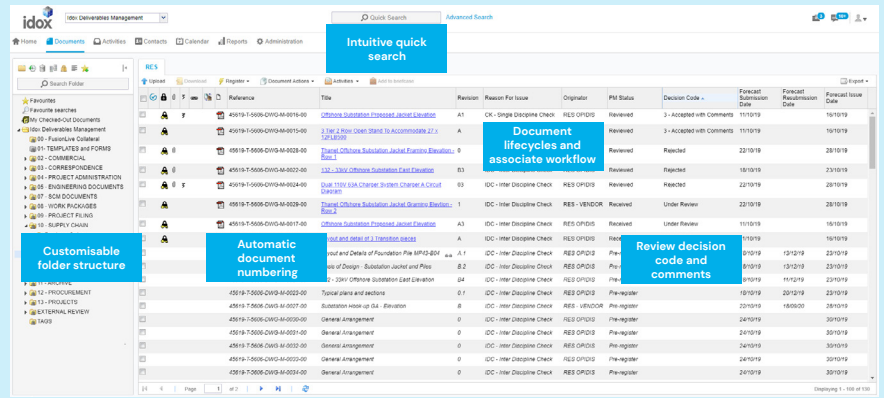

Automated tag extraction

Automated engineering tag extraction and verification establish accurate tag/document relationships, which facilitate rapid discovery and retrieval of relevant engineering information. Providing an accurate master document and tag register at project handover also avoids costly delays with expensive resource dedicated to locating information at the conclusion of the project.

Intuitive interface

Customisable folders facilitate a flexible project breakdown structure with external suppliers given visibility of only the folders and documents they need access to. Documents can be located in seconds using the powerful search or flexible folder browsing.

Reference	Title	Revision	Reason For Issue	Originator	PM Status	Decision Code	Forecast Submission Date	Forecast Revision Date	Forecast Issue Date

Driving efficiency

FusionLive can support the efficient delivery of your project from inception to handover:

- Reduce overall project delivery time by up to 20%
- Start projects up to five times faster
- Accelerate vendor document turnaround by up to 50%
- Increase worker productivity by 20%
- Reduce risk around contractual obligations
- Decrease dispute phase
- Supply complete, accurate master document and tag register at handover
- Save up to 80% of the time associated with manual tag extraction
- Improve tag accuracy and control
- Increase searchability and accessibility of engineering content

“Using FusionLive has given us a 20% increase on the number of documents we can process, quality control check and load into the system in a day. Its simplicity and flexibility has completely changed our ways of working for the better.”

Torxen

“In our experience Idox has excellent customer service and user support. The solution is very convenient for an owner that has multiple jobs in progress with different contractors.”

Cleco

“The time saving is huge. We can generate drawings and process them a lot quicker compared to standing by a printer and duplicating them manually. Our review process is also swifter, projects stay on schedule and submittals can be handled electronically.”
